

To begin editing your image, go to <https://pixlr.com/editor/>. Once there, you will see a welcome screen that looks similar to the one here. Click **Open Image From Computer**.

This will open a window where you will need to navigate to your file, select it, and click “**Open.**”

Select the **Marquee Tool**.

Then, select the **Elliptical Marquee**.

Click and drag around your image to get your desired shape.

Click **Edit**, then **Invert Selection**.

This will select the outer portion of the image that you want to get rid of.

Click the **Delete Key** on your keyboard.

Click **Edit**, then **Invert Selection**.

This will select the part of the image you want to use.

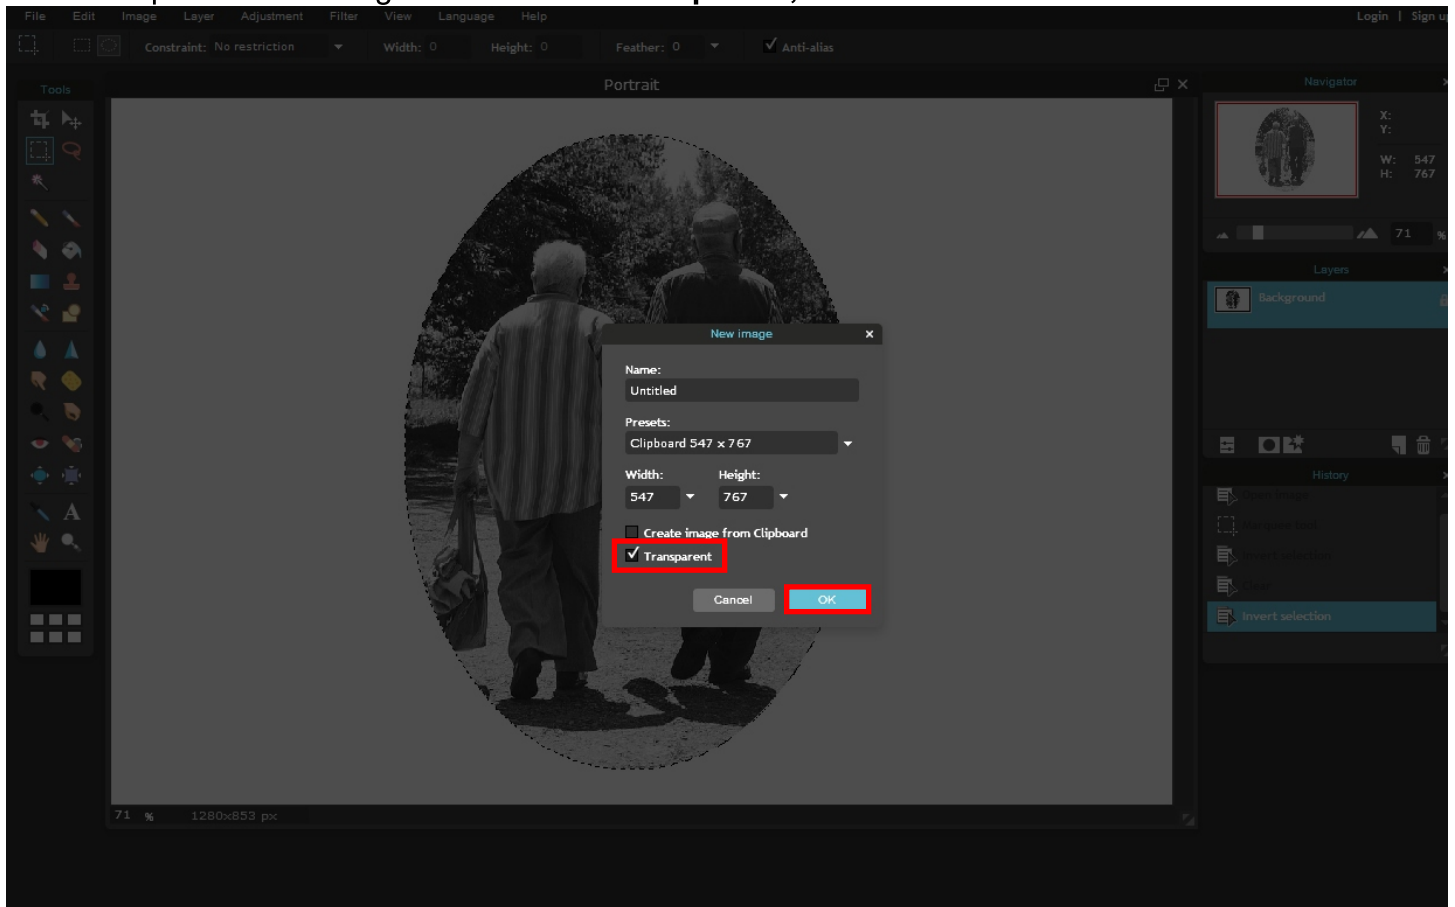

Click **Edit**, then **Copy**.

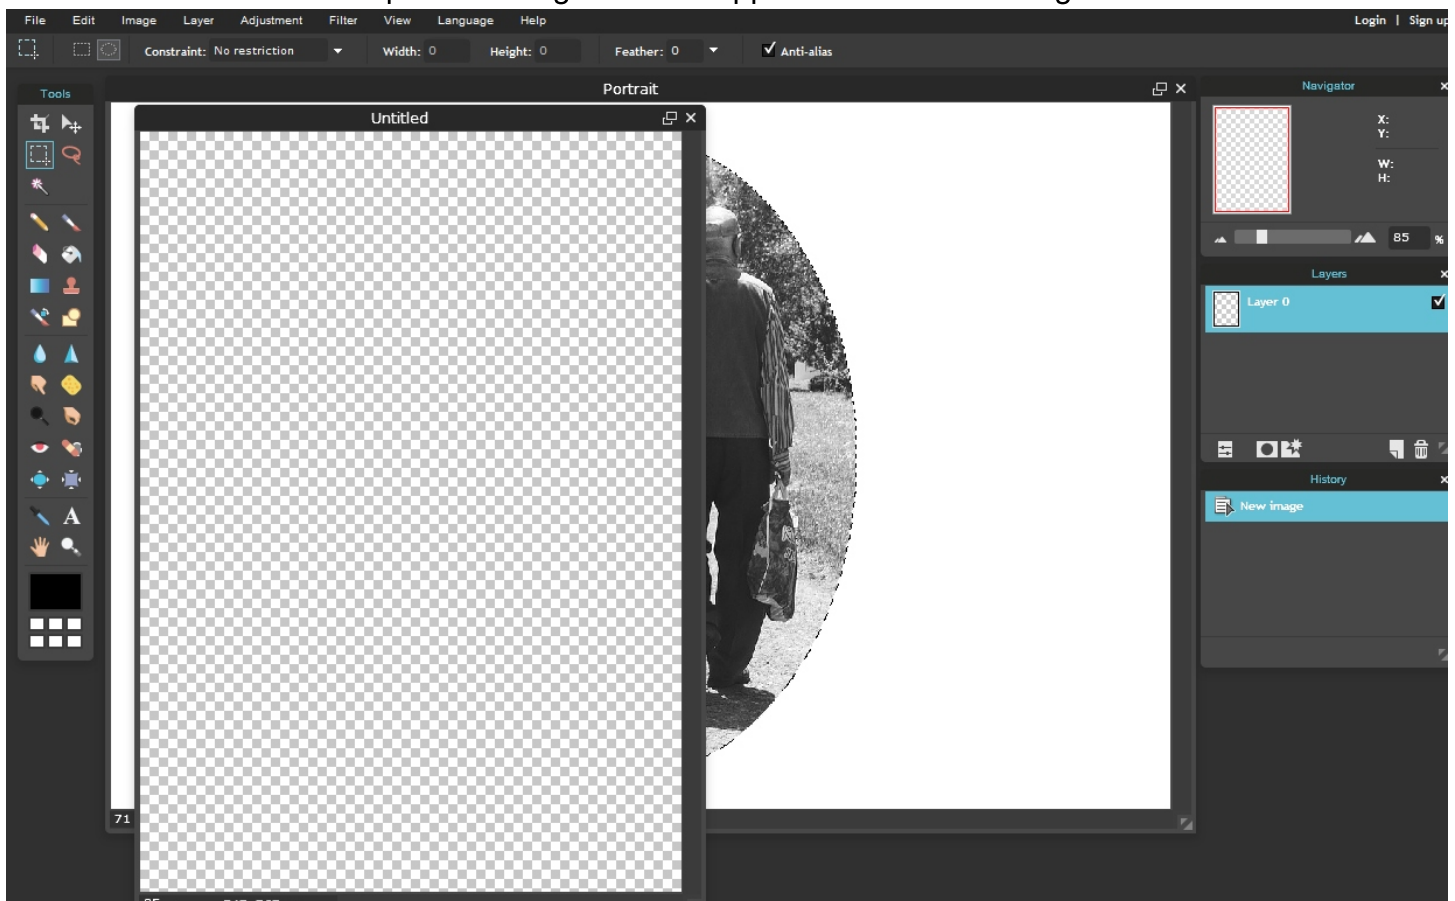

Click **File**, then **New Image**.

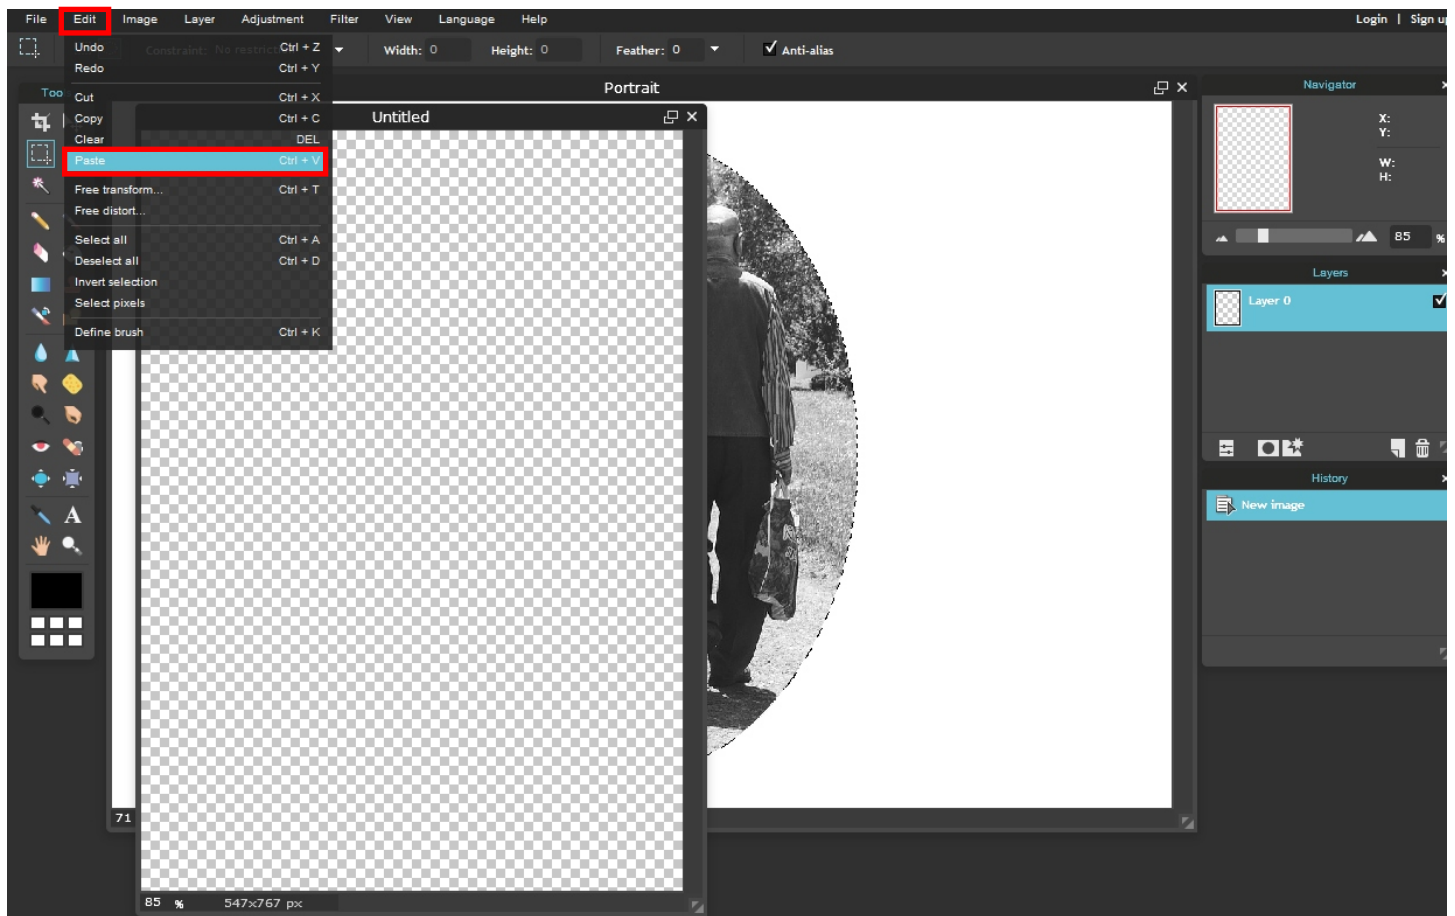

This will open a new dialogue box. Check **Transparent**, then click **OK**.

A new window with a transparent background will appear in front of the original window.

Click **Edit**, then **Paste**.

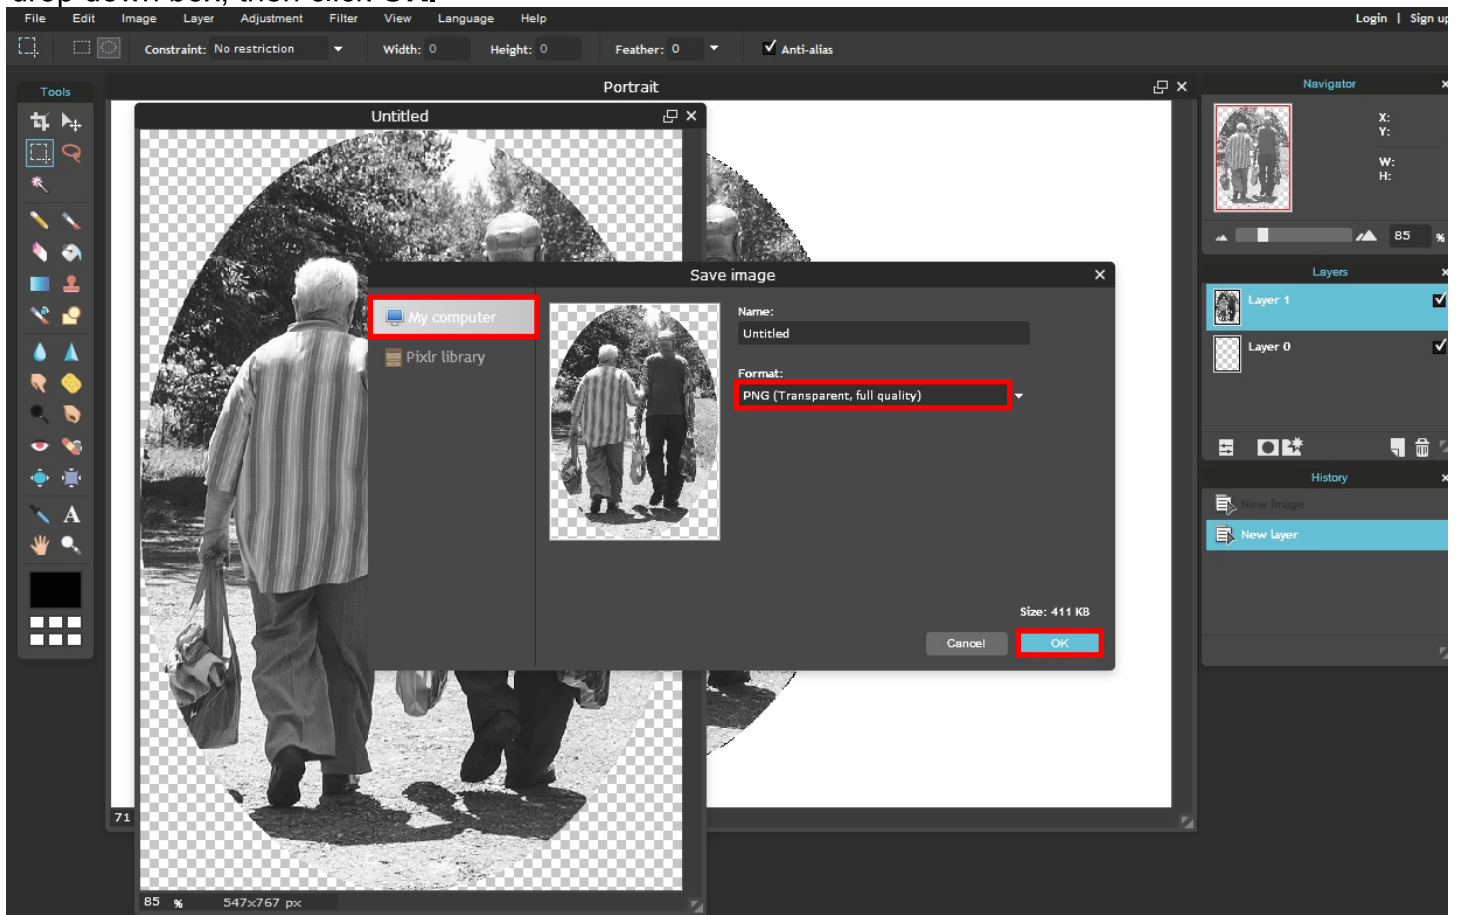

This will paste your image onto the transparent background.

Click **File**, then **Save**.

This will open a dialogue box. Be sure **My Computer** is selected. Select **PNG Format** from the drop down box, then click **OK**.

This will open a window where you may save your file. Navigate to your preferred folder, then click **Save**.
